

Fishbone Equipment

Fishbone is the recyclable can carrier that lets you eliminate plastic, use minimal material, and show your customers how much you care.

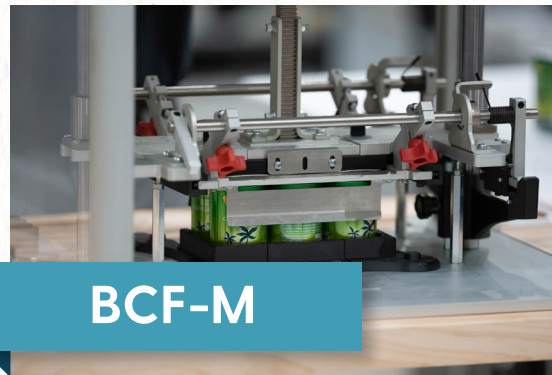

In addition to the sustainable can carriers, we've designed the Fishbone application equipment with new, innovative designs that accommodate varying production levels to make your operation run smoothly.

We have fully automatic, high speed machines as well as semi-automatic and manual (no air or power required) equipment options to help you maximize efficiency and performance.

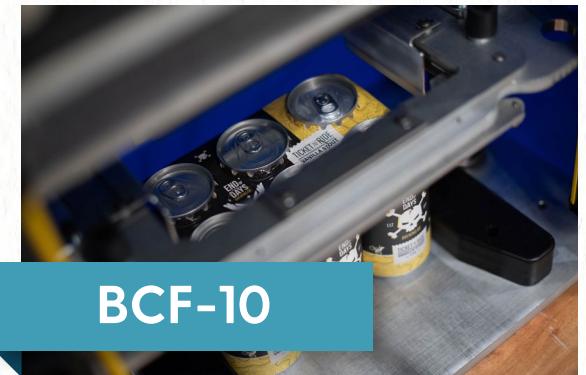

SNAPPER

Handheld applicator that requires no air or power

BCF-M

Manually operated table-top model that requires no air or power

BCF-10

Table-top design that requires air & power; includes an outfeed conveyor

BCF-25

Fully automated or semi automatic; runs up to 150 cans/minute

BCF-40

Intermittent motion design that runs up to 240 cans/minute

BCF-100

Fully automatic, high speed applicator; runs up to 600 cans/min
